Victor Henz

Washington, DC (from Jan 2027) | victor.henz@essec.edu | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI engineering student (CentraleSupélec x ESSEC, 4.0 GPA) who has built and shipped end-to-end AI tools used in production at Canal+, and co-founded a news app that reached 2,000+ users. Seeking a Summer 2027 internship in applied AI or data science in New York or San Francisco.

EDUCATION

CentraleSupélec and ESSEC Business School — Gif-sur-Yvette / Cergy, France
BSc AIDAMS (Artificial Intelligence, Data and Management Sciences) | GPA: 4.0 / 4.0 — *Expected 2028*
Relevant coursework: Machine Learning, Computer Vision, Stochastic Processes, Algorithms, Big Data Systems

George Washington University — Washington, DC
Exchange semester — *Jan – May 2027*

International School of Luxembourg — Luxembourg
International Baccalaureate Diploma — *2024*

EXPERIENCE

AI Engineer Intern — May 2026 – Aug 2026
Canal+ / Benelux Central Europe (BCE) — *Luxembourg*

- Shipped two internal AI applications to production (Next.js, TypeScript, Google Cloud Run) that let Canal+ leadership and editorial teams query company data and assemble content selections in natural language.
- Designed the analytics app's semantic layer: four Snowflake Cortex Analyst semantic views (executive KPIs, subscribers, content, usage) with multi-currency handling and verified queries for reliable answers.
- Built a Python pipeline ingesting streaming-ranking data into Snowflake to power themed content recommendations.
- Migrated the curation agent to the group's internal AI platform by engineering a text-to-SQL microservice (FastAPI, Docker, Cloud Run), reaching 35/36 (97%) on an automated evaluation suite.
- Presented to group leadership; the CEO of the Canal+ group requested a live demonstration.

Co-founder and Developer — Jan 2025 – Jun 2025
Parsed — *Luxembourg*

- Co-founded and launched an AI-powered news app on the App Store that personalizes daily news by profession and location; grew to 2,000+ users with coverage in the Luxembourg press.
- Built the personalization engine and a political-bias detection feature to deliver balanced news perspectives.

PROJECTS

Cut the Line | Secure Horizons 2026 Hackathon (ESSEC) — Oct 2026
Winner, €7,000 prize

- Won first place among 120 participants with a 4-person team, building a product that detects phone scams and AI-cloned voices.
- Pitched the product and its business plan (paid subscription for all age groups) to a jury of industry professionals, including KPMG's Head of AI.

EFC Tracker | Personal project — Jul 2026

- Built and deployed a progressive web app (Next.js, TypeScript, Upstash Redis, Vercel) with iOS push reminders for the ESSEC Football Club's 9-week conditioning program; extended it to the whole club.

SKILLS

Programming and Tools: Python, SQL, TypeScript, Next.js, FastAPI, Docker, Google Cloud Run, Vercel, Git
AI and Data: LLM agents, text-to-SQL, Snowflake (Cortex Analyst, Cortex Agents), semantic modeling, LLM evaluation
Languages: French (native), English (bilingual), German (proficient), Luxembourgish (proficient)

ACTIVITIES AND INTERESTS

- **Track and Field (2021–present):** Represented Luxembourg in the 1500m at the European Youth Olympic Festival; National U18 Champion in Cross Country and 800m; runner-up in the Senior Indoor 800m Nationals.
- **Football (2010–2024):** Over a decade at high level with Racing FC Union Luxembourg; MVP at NECIS Varsity, Amsterdam (2023).
- **Leadership:** AIDAMS class representative (2024–present), led a formal petition to the administration on GPA computation. Founded the school's first ELA Charity Week (2023), raising €1,200+.
